North Carolina’s July County and Area Employment Figures Released

RALEIGH —Unemployment rates (not seasonally adjusted) decreased in 90 of North Carolina’s counties in July, increased in two, and remained unchanged in eight. Scotland County had the highest unemployment rate at 9.0 percent, while Buncombe County had the lowest at 3.8 percent. Twelve of the state’s metro areas experienced rate decreases and three remained unchanged. Among the Metro areas, Rocky Mount at 7.3 percent experienced the highest rate and Asheville had the lowest rate at 4.0 percent. The July not seasonally adjusted statewide rate was 5.0 percent.

	Counties With Rates 5% or Below	Counties With Rates Between 5% and 10%	Counties With Rates 10% or Above
July	48	52	0
June (Revised)	36	64	0

When compared to the same month last year, not seasonally adjusted unemployment rates decreased in all 100 counties. All 15 metro areas experienced rate decreases over the year.

The number of workers employed statewide (not seasonally adjusted) increased in July by 6,056 to 4,616,358 while those unemployed decreased 7,785 to 241,175. Since July 2015, the number of workers employed statewide increased 103,448, while those unemployed decreased 60,423.

It is important to note that employment estimates are subject to large seasonal patterns; therefore, it is advisable to focus on over-the-year changes in the not seasonally adjusted estimates.

The next unemployment update is scheduled for Tuesday, September 20, 2016 when the state unemployment rate for August 2016 will be released.

This information may be accessed on the Commerce website at <http://www.nccommerce.com/lead>

Not Seasonally Adjusted

Estimates subject to monthly and annual revisions.

North Carolina Department of Commerce
Labor & Economic Analysis Division
Local Area Unemployment Statistics
(919) 707-1500

Technical Notes

This release presents labor force and unemployment estimates from the Local Area Unemployment Statistics (LAUS) program. The LAUS program is a federal-state cooperative endeavor.

Labor force and unemployment--from the LAUS program

Definitions. The labor force and unemployment estimates are based on the same concepts and definitions as those used for the official national estimates obtained from the Current Population Survey (CPS), a sample survey of households that is conducted for the Bureau of Labor Statistics (BLS) by the U.S. Census Bureau. The LAUS program measures employment and unemployment on a place-of-residence basis. The universe for each is the civilian noninstitutional population 16 years of age and over. Employed persons are those who did any work at all for pay or profit in the reference week (the week including the 12th of the month) or worked 15 hours or more without pay in a family business or farm, plus those not working who had a job from which they were temporarily absent, whether or not paid, for such reasons as bad weather, labor-management dispute, illness, or vacation. Unemployed persons are those who were not employed during the reference week (based on the definition above), had actively looked for a job sometime in the 4-week period ending with the reference week, and were currently available for work; persons on lay-off expecting recall need not be looking for work to be counted as unemployed. The labor force is the sum of employed and unemployed persons. The unemployment rate is the number of unemployed as a percent of the labor force.

Method of estimation. Statewide estimates are produced using an estimation algorithm administered by the BLS. This method, which underwent substantial enhancement at the beginning of 2005, utilizes data from several sources, including the CPS, Current Employment Statistics (CES), and state unemployment insurance (UI) programs. Substate estimates are produced using the "LAUS Handbook Method", which is also based on data from several sources. Each month, census division estimates are controlled to national totals, and state estimates are then controlled to their respective division totals. Substate estimates are controlled to their respective state totals. For more information about LAUS estimation procedures, see the BLS website at www.bls.gov/lau/laumthd.htm

Revisions. Labor force and unemployment data for the previous month reflect adjustments made in each subsequent month, while data for prior years reflect adjustments made at the end of each year. The monthly revisions incorporate updated model inputs, while the annually revised estimates reflect updated population data from the U.S. Census Bureau, any revisions in the other data sources, and model reestimation.

Area definitions. The substate area data published in this release reflect the standards and definitions established by the U.S. Office of Management and Budget on February 28, 2013. A detailed list of the geographic definitions is available online at www.bls.gov/lau/lausmsa.htm.

Reliability of the estimates

The estimates presented in this release are based on sample surveys, administrative data, and modeling and, thus, are subject to sampling and other types of errors. Sampling error is a measure of sampling variability--that is, variation that occurs by chance because a sample rather than the entire population is surveyed. Survey data also are subject to nonsampling errors, such as those which can

be introduced into the data collection and processing operations. Estimates not directly derived from sample surveys are subject to additional errors resulting from the specific estimation processes used.

Model-based error measures for seasonally adjusted and not seasonally adjusted data and for over-the-month and over-the-year changes to LAUS statewide estimates are available online at www.bls.gov/lau/lastderr.htm.

Release Dates

The next unemployment update is scheduled for Tuesday, September 20, 2016 when the state unemployment rate for August 2016 will be released.

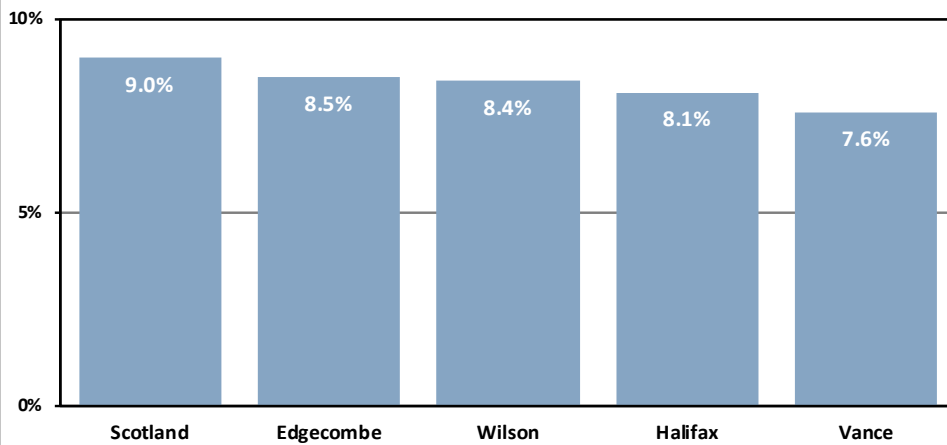

The complete 2016 data release schedule can be accessed at:

<http://www.nccommerce.com/lead/research-publications/schedule-of-release-dates>

Counties With Highest Unemployment Rates

July 2016*

(Not Seasonally Adjusted)

North Carolina's statewide unemployment rate (not seasonally adjusted) was 5.0 percent in July. This was 0.1 of a percentage-point decrease from June's revised rate, and a 1.3 percent decrease over the year.

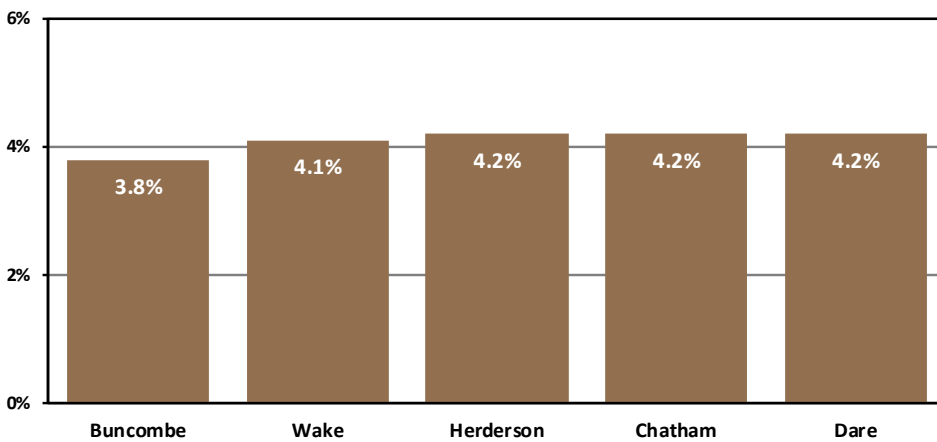

Over the month, the unemployment rate decreased in 90 counties, while increasing in two and remaining unchanged in eight. Forty-eight counties had unemployment rates at or below the state's 5.0 percent rate.

Scotland county recorded July's highest unemployment rate at 9.0 percent, followed by Edgecombe at 8.5 percent, Wilson at 8.4 percent, and Halifax at 8.1 percent. Buncombe County had the lowest unemployment rate at 3.8 percent, followed by Wake at 4.1 percent.

Counties With Lowest Unemployment Rates

July 2016*

(Not Seasonally Adjusted)

Unemployment rates decreased in 12 of the state's 15 Metropolitan Statistical Areas (MSAs) over the month. The Rocky Mount MSA had the highest unemployment rate in July at 7.3 percent, followed by Fayetteville at 6.4 percent. Asheville reported the month's lowest unemployment rate at 4.0 percent, followed by Raleigh, 4.2 percent, Durham/Chapel Hill, 4.4 percent and Wilmington, 4.6 percent.

Metropolitan Statistical Areas' Unemployment Rates

July 2016*

(Not Seasonally Adjusted)

*All July 2016 data are preliminary.

Note: All data are Not Seasonally Adjusted. All July 2016 data are preliminary.

Over the month, net industry employment decreased in all 15 MSAs. Charlotte/Concord/Gastonia, NC-SC had the largest net employment decrease with 20,900, followed by Greensboro-High Point, 6,600; Winston-Salem, 5,600; Fayetteville, 4,000; and Asheville, 3,600. Jacksonville experienced the greatest percentage decrease at 5.2 percent, followed by Goldsboro, 3.3 percent; Fayetteville, 3.1 percent; Winston-Salem, 2.2 percent; and Asheville, 1.9 percent. It is important to note that employment estimates are subject to large seasonal patterns; therefore, it is advisable to focus on over-the-year changes in the not seasonally adjusted series.

Over the year, employment rose in 14 of 15 MSAs. Charlotte/Concord/Gastonia, NC-SC had the largest net employment increase at 24,000, followed by Raleigh, 19,400; Durham/Chapel Hill 6,700; Greensboro/High Point, 6,100; and Fayetteville, 2,700. Raleigh had the greatest percentage increase at 3.3 percent, followed by Durham/Chapel Hill, 2.3 percent; and Charlotte/Concord/Gastonia, NC-SC & Fayetteville, 2.2 percent. A decrease was reported in Rocky Mount (400, 0.7%).

North Carolina Rate 5.0%
Not Seasonally Adjusted

July marked a minor statistical milestone for North Carolina's economy – the State unemployment rate dipped below the US for the first time in nearly two years. However, the number of employed people declined as well. We've seen a high degree of volatility in this data in 2016. Since the beginning of the year, the labor force participation rate (LFPR) has had the two greatest monthly increases and decreases of the past five years; and has now settled back to its January level. Remember that monthly estimates can sometimes be noisy and distort the bigger picture. The broader trend still points to a tightening labor market.
